Application/Control Number: 10/722,060

Art Unit: 1625

Applicant's arguments with respect to claims 1-4, 7-9, 12-14, and 16-18 have been considered but are moot in view of the new ground(s) of rejection.

#### **The Status of Claims:**

Claims 1-4, 7-9, 12-14, and 16-18 are pending.

Claims 12-14 has been rejected.

Claims 1-4, and 7-9 are allowable.

Claims 16-18 are objected.

#### **DETAILED ACTION**

## **Priority**

1. None.

## **Drawings**

2. None.

## **Claim Objections**

Claims 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/722,060

Art Unit: 1625

#### Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12-14 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a method for treatment of viral infection for HIV-1 infection, does not reasonably provide enablement for all viral infections. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to include all the viral infections unrelated to the invention commensurate in scope with these claims. The following is the general information of the viral infection as shown in Merck manual Home edition ,Feb. 1 ,2003):

Viruses usually infect one particular type of cell. For example, cold viruses infect only cells of the upper respiratory tract. Additionally, most viruses infect only a few species of plants or animals; some infect only people.

Probably the most common viral infections are those of the nose, throat, and airways. These infections include sore throat, sinusitis, the common cold, and influenza. Doctors often refer to these as upper respiratory infections (URIs). In small children, viruses also commonly cause croup and inflammation of the windpipe (laryngitis) or other airways deeper inside the lungs (bronchiolitis, bronchitis (see Respiratory Disorders: Bronchiolitis).

Some viruses (for example, rabies, West Nile virus, and several different encephalitis viruses) infect the nervous system (see <u>Infections of the Brain and Spinal Cord: Viral Infections</u>). Viral infections also develop in the skin, sometimes resulting in warts or other blemishes (see <u>Viral Skin Infections: Warts</u>). Additionally, many viruses commonly infect infants and children (see <u>Viral Infections: Introduction</u>).

Application/Control Number: 10/722,060

Art Unit: 1625

Other common viral infections are caused by the herpesviruses. Eight different herpesviruses infect people. Three of these—herpes simplex virus type 1, herpes simplex virus type 2, and varicellazoster virus—cause infections that produce blisters on the skin. Another herpesvirus, Epstein-Barr virus, causes infectious mononucleosis. Cytomegalovirus is a cause of serious infections in newborns and in people with a weakened immune system. It can also produce an illness similar to infectious mononucleosis in people with a healthy immune system. Human herpesviruses 6 and 7 cause a childhood illness known as roseola infantum (see <u>Viral Infections: Roseola Infantum</u>). Human herpesvirus 8 has been implicated as a cause of cancer (Kaposi's sarcoma) in people with AIDS.

In view of this information, it becomes clear that the specification has failed to describe treatments of any kinds of the viral infections, such as , upper respiratory tract viral infection, the viral infections caused by rabies, West Nile virus, encephalitis virus, and etc. by using the claimed compounds. Furthermore, many viruses have a different way of attacking target cells and a different mode of infecting, propagating their viral genetic materials; thus, it is highly improbable that the claimed compounds of formula I would act as a silver bullet to treat all kinds of viral infections regardless of their causes.

Therefore, an appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claim, "a mixture of compounds of formula I" is recited. This expression is vague and indefinite because this limitation does not elaborate what the mixture of

Art Unit: 1625

compounds of formula I is described; this should be dependent on some independent claim with the "formula I". Therefore, an appropriate correction is required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Taylor Victor Oh whose telephone number is 571-272-0689. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas McKenzie can be reached on 571-272-0670. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
